react tv-shows

Developed a website using React Hooks, Redux Toolkit, Bootstrap, HTML5, and CSS3 that allows users to browse and search for movies and TV shows. The website requires users to register and login before they can access the content. Once logged in, users can navigate between pages and view the poster and information about each movie or TV show.

CRUDS Operations

Developed a web application using JavaScript that allows users to perform CRUD (Create, Read, Update, and Delete) operations on a database. The application provides a user-friendly interface for users to interact with the database and manage the data.
